PROFESSIONAL SUMMARY

Computer Science & Design student (VTU, Class of 2027) with a CGPA of 9.11, specializing in Python development, artificial intelligence, and research-driven software engineering. Skilled in building AI-powered systems for healthcare, accessibility, and intelligent automation, with hands-on experience across the full development lifecycle from prototyping to deployment.

CORE SKILLS

Python, Java, Machine Learning, Generative AI, VS Code, MongoDB, MySQL, Bootstarp, Cloud computing.

EDUCATION

PES Institute of Technology & Management Expected 2027
Bachelor of Engineering (B.E.) in Computer Science & Design | CGPA: 9.11

EXPERIENCE

PythonDevelopmentIntern—AgnirvaLearningCommunity 3 Months

- Developed Python-based applications and automation scripts to streamline recurring workflows.
- Strengthened proficiency in object-oriented programming, problem-solving, and software engineering best practices.
- Collaborated within a mentor-guided team environment, contributing to code reviews and iterative feature development.

FEATURED PROJECTS

MediTwinAI

- Built a multi-agent digital twin platform delivering predictive healthcare decision support through coordinated AI agents.

SignARise

- Developed an AI-powered accessibility platform enabling seamless communication across sign language, speech, and text modalities.

StyleGenAI

- Designed a GAN-based text style transfer system leveraging reinforcement learning and NLP techniques.

BlockFLSecure

- Engineered a blockchain-enabled federated learning framework to support secure, decentralized AI model training.

CERTIFICATIONS

- NPTEL — Cloud Computing
- NPTEL — Blockchain
- NPTEL — Theory of Computation
- Udemy — Data Structures using Python

ACHIEVEMENTS

- Academic Excellence Award
- Participant, Smart India Hackathon 2024
- Student Placement Coordinator, PESITM CSD

LANGUAGES

English, Kannada, Hindi, Spanish (Beginner)
